

BREAKING: SARS-COV-2 (COVID-19) Vaccine Named a Poison and Gene Technology Using GMOs for Private”Emergency Management” of Elderly and Care Home Staff by Australian Health Authority

This is extraordinary news which raises a number of questions, whichever way you look at it. A Public Health Authorization has surfaced online, naming the COVID-19 vaccine a poison, as well as referring to it as gene technology using GMOS, among other revelations.

Dr. Andrew Robertson, Chief Health Officer, Western Australia, has signed this authorization dated 18 February 2021 to “supply or administer a poison [SARS-COV-2 (COVID-19) Vaccine-Australian Defence Force]” for purposes of emergency management during a public health emergency to authorize specific “persons”, further elaborated in an annexure to be nurses and midwives, contracted or subcontracted to Aspen Medical or “an entity contracted by Aspen Medical Pty Ltd” to receive, possess, supply, and administer the VACCINE—spelled in all caps—to staff and residents at residential aged care and disability facilities.

[Public Health Act 2016 \(WA\) – Instrument of Authorisation – Authorisation to Supply or Administer a Poison \[SARS-COV-2 \(COVID-19\) VACCINE – Australian Defence Force\] \(No.2\) 2021](#)

Public Health Act 2016 (WA) – Instrument of Authorisation – Authorisation to Supply or Administer a Poison [SARS-COV-2 (COVID-19) VACCINE – Australian Defence Force] (No.2) 2021

Guidance: An authorisation by the Chief Health Office under the s. 197 and s.198 Public Health Act 2016 (WA) to authorise relevant Australian Defence Force employees to supply and administer the COVID-19 Vaccine.

This Public Health Authorization, shared with this writer on email this morning—first posted at FromRome.info: [Western Australian Government Classifies COVID Vaccine as a Poison](#)—and currently being shared online, [can be found here](#) and has been [uploaded in PDF here](#). (Click to download the PDF)

Authorizes Aspen Medical Nurses and Midwives to Administer Poison to Care Home Staff and Residents

The authorization appears to be specifically aimed at authorizing Aspen Medical’s contractors to administer a poison, parenthetically named the SARS-COV-2 (COVID-19) VACCINE to care home residents and staff. This is curious in itself and bears further investigation. Is it possible that the Western Australian Government is putting the truth in plain sight here?

The mRNA vaccines have been causing death, fatal blood clots, and instant disability in thousands of cases worldwide, recorded at the CDC VAERS database, at the Yellow Card program in UK, at [EudraVigilance](#) in Europe, and various other databases elsewhere no doubt. Immunologists like [Dr. Sucharit Bhakdi](#), [Dr. Michael Yeadon](#) and [Professor Dolores Cahill](#) have been openly calling for a halt to the vaccines, pointing to the rising numbers of deaths and describing how they may be working, via spike protein or cytokine storms to cause blood coagulation, brain shutdown, neuro-inflammation, and organ damage; [as Dr. Bhakdi explains, these are gene-based vaccines](#), never tested before on humans, and all being vaccinated now are actually being used as human guinea pigs without Informed Consent.

Aspen Medical is a private healthcare provider which seems to be running the Australian Government, and particularly, their Health and Public Health activities. From their website:

“Founded in 2003 by Glenn Keys AO, Aspen Medical is an Australian-owned, multi award-winning, global provider of guaranteed and innovative healthcare solutions across a diverse range of sectors and clients including [Defence](#), [Mining & Resources](#), [Oil & Gas](#), [Government](#) and [Humanitarian](#).”

Schedule 4 Medicine or Schedule 4 Poison?

The Authorization makes reference to the Public Health Act of 2016, the Australian COVID-19 Vaccination Policy, and the COVID-19 Vaccine National Rollout Strategy.

The Authorization also mentions the [Medicine and Poisons Act \(2014\)](#) and the Medicine and Poisons Regulation (2016), stating that those administering the vaccine must record each administration event and adverse reaction event in line with Schedule 4 medicines in the Act, which, from the Medicine and Poisons Act, is found to comprise “**Prescription only medicines, or Prescription Animal Remedy.**” Schedule 5 is listed as Caution, Schedule 6 as Poison, Schedule 7 as Dangerous Poison, Schedule 8 as Controlled Drug, and Schedule 9 as Prohibited Substance.

In the Medicines and Poisons Act 2014, Part I which describes the terminology refers to Schedule 4 as Schedule 4 Poison, and thence all classifications are listed under Section 4 as Poisons:

Schedule 4 poison means a substance that is classified by regulations made under section 4(1) as a poison included in Schedule 4;

4. Poisons

- (1) The Governor may, on the recommendation of the Minister, make regulations classifying a substance as a poison included in a Schedule referred to in the Table.

Table

Schedule 1 — [Blank]

Schedule 4 — Prescription only medicines, or Prescription Animal Remedy

Substances, the use or supply of which should be by or on the order of persons permitted under the Act to prescribe and should be available from a pharmacist on prescription.

It is not quite clear therefore whether the Medicine and Poisons Act 2014 is offering a classification of substances used as medicine along the medicine-to-poison scale, with Schedule 2 and 3 being Pharmacy medicines, and oddly, Schedule 1 being left blank—perhaps over-the-counter medication, or just stressing they’re all poisons, as that section header (4) declaims, with slight variations in potency based on numbering in the schedule table.

Lingering question: why is the COVID vaccine being named a poison and a Schedule 4 prescription-only medicine at the same time?

[That all vaccines are poisons, and contain antigens](#) which have poisonous effects has long been discussed by scientists questioning the use of vaccines, particularly on evidence of the diverse adverse events recorded, including autism, paralysis, and SIDS.

Further clarity accrues from the named [Sections 197 and 198 of the Public Health Act of 2016](#) which states it overrides the 2014 edition of the Medicines and Poisons Act, and more clearly uses the term “Poison.”

PUBLIC HEALTH ACT 2016 (WA)

Sections 197 and 198

AUTHORISATION (No 3) TO SUPPLY OR PRESCRIBE A POISON

The World Health Organization declared COVID-19 a pandemic on 11 March 2020.

On 23 March 2020, the Minister for Health declared a public health state of emergency with effect from 1.30 p.m. on 23 March 2020 in respect of COVID-19 pursuant to section 167 of the *Public Health Act 2016 (Act)*. The public health state of emergency applies to the State of Western Australia.

Authorisation

For the purposes of emergency management during this public health state of emergency and pursuant to section 197 of the Act, I, Dr Andrew Robertson, Chief Health Officer, authorise:

- (a) a **prescriber** to prescribe a **Schedule 4 poison** or a **Schedule 8 poison** through the provision of a digital image or a **copy** of a **prescription** to a **pharmacist**, subject to the directions in paragraph 1; and
- (b) a **pharmacist** to supply a Schedule 4 poison or a Schedule 8 poison upon receiving a digital image or a copy of a prescription for that poison, subject to the directions in paragraph 2.

PUBLIC HEALTH ACT 2016 - SECT 197

197 . Chief Health Officer may authorise persons to administer, manufacture, supply or prescribe poisons

(1) In this section —

poison —

- (a) until the commencement of the [Medicines and Poisons Act 2014](#) section 3, has the meaning given in the *Poisons Act 1964* section 5(1); and
 - (b) after the commencement of the [Medicines and Poisons Act 2014](#) section 3, has the meaning given in that section.
- (2) For the purposes of emergency management during a public health state of emergency —
- (a) the Chief Health Officer may authorise a person, or class of persons, to administer, manufacture, supply or prescribe a poison; and
 - (b) a person authorised under paragraph (a) may administer, manufacture, supply or prescribe a poison.
- (3) The Chief Health Officer may give directions in relation to the exercise of a power under subsection (2)(b).
- (4) When exercising a power under subsection (2)(b), a person must comply with —
- (a) the terms and conditions of the authorisation (if any); and
 - (b) any directions of the Chief Health Officer given under subsection (3).
- (5) This section overrides the [Poisons Act 1964](#) , the [Medicines and Poisons Act 2014](#) and the [Misuse of Drugs Act 1981](#) .

But this is rather startling disclosure that the COVID vaccine is known to be poisonous, and is classified as a Poison, by the very health officer authorizing its usage on the elderly, using “emergency management” and “public health emergency” as justification.

Looking up Dr. Andrew Robertson's background also reveals he served in the Royal Australian Navy including on 3 tours to Iraq as United Nations Biological Weapons Chief Inspector—indicating an awareness of biological weapons, which he now seems to be sanctioning, in his role as Public Health Officer.

[AU News Yahoo](#)

(Dr. Lee Merritt has called the vaccine a bioweapon. Dr. Michael Yeadon has stressed the mRNA vaccines will unleash a biological engine with unknown longterm effects in the body. Dr. Bhakdi and Dr. Mikovits have stressed neuro-damage as a consequence of the mRNA vaccines. Dr. Andy Wakefield has likened the endless creation of spike proteins in the body by the mRNA vaccines to the unleashing of a T Rex.)

COVID-19 Vaccine Contains GMOs

This authorization also discloses that the SARS-COV-2 (COVID-19) VACCINE—“all the adenovirus vaccines and some of the mRNA vaccines” contain GMOs, or genetically modified organisms.

Perusing Annexure B of this Public Authorization PDF titled “[Public Health Act 2016 \(WA\) – Instrument of Authorisation – Authorisation to Supply or Administer a Poison SARS-COV-2 \(COVID-19\) VACCINE – Australian Defence Force 2021](#)” one quickly finds, on Page 12 that the Office of the Gene Technology Regulator is required “to approve and license any COVID-19 vaccines being administered in Australia that use GMOs. These include all the adenovirus vaccines and some of the mRNA vaccines.”

The [Office of the Gene Technology Regulator](#) has been established it appears to ensure regulation of licenses and use of GMOS as stipulated by the Gene Technology Act of 2001—which tells us the use of GMOS and gene-technology in a variety of arenas, particularly “Human Health” has been long in the making and planning.

The Office of the Gene Technology Regulator (OGTR)

The OGTR is responsible for the regulation of genetically modified organisms (GMOs) in accordance with the *Gene Technology Act 2001*. The objective of the Act is to protect the health and safety of people, and to protect the environment, by identifying risks posed by or as a result of gene technology, and by managing those risks through regulating certain dealings with GMOs.

The OGTR will be required to approve and license any COVID-19 vaccines being administered in Australia that use GMOs. These include all the adenovirus vaccines and some of the mRNA vaccines. Protein subunit vaccines will not generally require OGTR approval.

Australian COVID-19 Vaccination Policy
1/2/21

The Gene Technology Act of 2001 has interesting definitions of the term “deal with GMOs” to include manufacture and propagation of GMOS:

deal with, in relation to a GMO, means the following:

- (a) conduct experiments with the GMO;
- (b) make, develop, produce or manufacture the GMO;
- (c) breed the GMO;
- (d) propagate the GMO;
- (e) use the GMO in the course of manufacture of a thing that is not the GMO;
- (f) grow, raise or culture the GMO;
- (g) import the GMO;
- (h) transport the GMO;
- (i) dispose of the GMO,

Gene Technology Act, 2001

and includes the possession, supply or use of the GMO for the purposes of, or in the course of, a dealing mentioned in any of paragraphs (a) to (i);

The [Gene Technology Regulator Statement of Intent 2020-2023](#) is a rather interesting document requiring its own separate analysis, which, among other things defines gene technology and reveals as its stakeholders the very research institutions, Universities, and “bio-hackers” pushing the Gene Technology agenda—which, arguably, is indeed the gene-based vaccines and gene-therapy agenda, with its parallel intent to re-code, replace, and acquire control over the human genome.

This is exactly how, worldwide, the entire spectrum of dubious, questionable, and often highly unethical technology is being rolled out, with documents, statements of intent, future vision and strategy documents which project complacency, wide acceptance, and public consent—when no public disclosure, public questioning and debate, and public consent has actually occurred, a dangerous strategy which results in the kind of situation we are seeing now: [experimental gene-based vaccines causing thousands of deaths and adverse events worldwide.](#)

Gene technology in Australia

Gene technology (also known as genetic engineering or genetic modification) provides ways to make changes to genes – the sets of instructions in the cells of all living organisms. There is a large amount of overlap between ‘gene technology’ and the newer term ‘synthetic biology’. Gene technology can be used in agriculture, environmental management, and pharmaceutical development. It also refers to the production of GMOs and the manufacture of products from them. The largest application of gene technology in Australia involves human health, including both understanding disease and pathogens, and the development of drugs and other therapeutics to aid in their treatment. Other major areas are agricultural applications, and diagnostics. Newer areas under research and development include environmental management, the control of introduced pest species, bioremediation activities and the large scale production of industrially useful substances such as biofuels or bioplastics.

Our Stakeholders

General Public	The wider community including members of the public and students with questions about or an interest in gene technology People and organisations with concerns about the safety of gene technology The media
Government	Minister and Department of Health LGFGT - National, state and territory ministers involved in gene technology regulation Commonwealth and state government departments and agencies involved in gene technology regulation Local councils in areas where GMOs are proposed to be released into the environment International agencies with an interest in Australian gene technology regulation
People working with or wishing to work with GMOs	Researchers, universities and research organisations Companies seeking to commercialise GMOs, including human therapeutics Farmers and agricultural organisations Community scientists / biohackers

Australian Defence Forces Wedded to the Vaccine?

As to the mystery of the Australian Defence Forces being named in the VACCINE name– “[SARS-COV-2 (COVID-19) Vaccine-Australian Defence Force],” the ADF was called to help administer the vaccines in care homes in early March, supposedly after private healthcare providers fell behind schedule and proved incompetent, as per the Sydney Morning Herald of March 2, 2021–[ADF Called in to Assist Aged Care Vaccine Rollout](#):

“The Australian Defence Force will support the private logistics and healthcare companies already providing vaccines at aged care facilities around the country, with the addition of ADF personnel in logistics teams as well as more security and clerical staff.

The military support comes after the aged care rollout fell behind schedule just days into the program last week, after a bungle that saw two aged care residents receive [four times the prescribed dose](#).”

Sydney Morning Herald of March 2, 2021– ADF Called in to Assist Aged Care Vaccine Rollout:

But the use of the military to administer the vaccines—now more generally, not just to inject the captive elderly in care homes—may have been planned from the outset, and implemented to present to the populace the illusion of total spectrum control, the kind of all-around coverage and control these government groups like to project, while also setting loose the fear of martial law and mandatory vaccinations which indeed has frequently surfaced as possibility and been discussed openly by many media outlets.

The connections between the Pharma industry, the military, and governments continue to be a subject for further exploration. Pfizer and Moderna, it must be remembered, [developed the mRNA vaccines on contract from DARPA](#), a weapons research agency which develops weapons of every kind.

This acknowledgment of the COVID-19 vaccine—possibly intentionally by only a remote outpost of the Global Empire—as poison and gene technology requiring OGTR oversight and approval is significant.
